

8,269 students realised their engineering dream last year at Edutech Expo. Even more will – this year.

Hundreds of engineering institutions have come up recently. Students and parents now have a choice. With this 'choice' comes confusion. Edutech Expo attempts to make it easy for would-be engineers and their parents to choose the right institutions. It's the only event that focuses on nothing else but engineering institutions, and naturally, leading engineering institutes will be there to interact with the next generation of engineers.

Expo Highlights

- Leading engineering colleges will participate
- Avail sponsorships and discount packages
- Popular engineering courses like
Civil, Mechanical, Electronics, Telecom
- Running successfully since 4 years
