

```
#####
```

```
##
## Declarations
##
#
type myapp_t;
type myapp_exec_t;
##macro expansion
#domain_type(myapp_t)
attribute domain;
typeattribute myapp_t, domain;
###
domain_entry_file(myapp_t, myapp_exec_t)
#
type myapp_log_t;
logging_log_file(myapp_log_t)
#
type myapp_tmp_t;
files_tmp_file(myapp_tmp_t)
#
#####
##
## Myapp local policy
##
#expanded macros read_file_perms and append_file_perms
allow myapp_t myapp_log_t::file { open getattr read ioctl lock append };
#expanded macro manage_file_perms
allow myapp_t myapp_tmp_t::file { create open getattr setattr read write
append rename link unlink ioctl lock };
files_tmp_filetrans(myapp_t, myapp_tmp_t, file)
```

#

Similarly, the macro `domain_entry_file(myapp_t, myapp_exec_t)` expands to:

```
attribute entry_type;
allow myapp_t myapp_exec_t::file entrypoint;
allow myapp_t myapp_exec_t::file { getattr open read execute ioctl lock };
typeattribute myapp_exec_t entry_type;
#corecmd_executable_file($2)
attribute exec_type;
typeattribute myapp_exec_t exec_type;
attribute file_type, non_security_file_type;
typeattribute myapp_exec_t file_type, non_security_file_type;
```

I leave it as an exercise to the reader to expand the other macros in the given example.te file. You may mail me the final expanded version of this file, if you so desire. As you can see, you can easily reuse these modules in various modules that you write. In the next article, we shall take a deeper look at the attribute, typeattribute and typealias definitions. Do feel free to contact me if you are facing any issues with SELinux. **END**

Inviting FOSS experts to write articles on their area of interest

LFY covers a myriad of topics—network management, software development, embedded systems, community issues, and even hands-on guide for newbies. If you've got an interesting topic, let us know. Thanks to the launch of www.openTis.com (aka linuxforu.com) we are now trying to extend our content portfolio related to Linux & Open Source.

To know more on how to become an LFY author, contact us at lfyedit@efyindia.com

Few topics that top our list:

- ◆ Tips 'n' Tricks for software developers or IT implementers
- ◆ Cool tweaks for FOSS enthusiasts
- ◆ FOSS on mobile
- ◆ Virtualisation (Implementation)
- ◆ OpenJDK or Java on Linux
- ◆ OpenSolaris (software development)
- ◆ How can I do "that" on Linux
- ◆ Reviews of latest open source projects & tools
