ED: Nirmal, your suggestions are indeed very useful. From our side, we'd like to start implementing them as soon as we can. We'll keep you posted.

FreedomYug (e-mail to Niyam)

I read your article on 'muft' books in the 'FreedomYug' column. I really appreciate your effort in sharing your thoughts about freedom in the various domains that affect non-techies in their everyday life. But, it's regrettable that you can't find any GNU/Linux or Ubuntu books in your nearby book stall. Also, something not covered in your article, but worth writing about, is the 'Ubuntu Manual' project (<http://ubuntu-manual.org>). As the name suggests, it is a manual for Ubuntu that covers newbie-level topics. It is growing larger and the contributors are trying hard to complete it in time for the release of Ubuntu 10.04 on April 29. So, if this could be included in your column, the readers of *LFY* can give something back to the project.

Ubuntu 10.4 remastered

I am anticipating that *LFY* will ship the Ubuntu 10.4 LTS edition soon. I have one request: please do more than that, using remastersys.

- Language support: remove foreign language packs and,

instead, add local languages (fonts, IME, translations, etc).

- Add useful software for developers (and CS undergraduates and MCA students). This list includes—OpenJDK compiler, Netbeans, Eclipse, Flex/Bison, kernel sources, make and related tools, and libgtk, lib opengl, UML tools, etc.

- Popular audio/video codecs

- HP and other printer support. Any single HP printer installation brings in drivers for lots of models.

I know of students and home users who feel stuck without the above software. Internet availability, speed and cost are still an issue. At a personal level, I have used 9.04 and done all the above steps. The resulting image is popular with MCA students in my circle. I hope such a step from *LFY* can scale this to a wide audience.

ED: Thanks a ton for your insightful suggestion. We've passed on your request to our CD team, and hope to be able to churn it out. 

Please send your comments or suggestions to:
