

Table 1: WebTest vs Selenium

Feature	WebTest	Selenium
Browser fidelity	x	✓
Reports	✓	x
Speed	✓	x
Integration in the development process	✓	x
Scalability	✓	x
Capturing JS errors	✓	x
Testing AJAX	✓	✓
Beginner-friendly	✓	✓
Documentation	✓	x
Predictable behaviour	✓	x
Xpath support	✓	x
Support for badly-formed HTML code	x	✓
Extensibility	✓	x
Data-driven tests	✓	x
Multi-language support	✓	✓
Internationalisation support	✓	x
Support for non-HTML content	✓	x

Note: The tick mark signifies that the feature is available in the respective tool or that support for it is superior compared to its counterpart.

Tip: Both WebTest and Selenium have full support for testing AJAX-based Web pages.

Courtesy: <http://imguillem.wordpress.com/2007/10/29/webtest-vs-selenium-webtest-wins-13-5>

- `setInputField` – Sets the value of the named HTML input field to the supplied value
- `clickButton` – ‘Clicks’ the specified button in the HTML form

A list of WebTest tags can be found at: <http://webtest.canoo.com/webtest/manual/syntaxCore.html>.

Tip: Like in any other XML document, the tags in a WebTest suite are case-insensitive.

Why WebTest?

Selenium is another very good tool for writing automated test suites for Web applications. Why choose WebTest

over Selenium? I'm not going to cover every aspect of the differences in detail, but Table 1 gives you an idea of the pros and cons of both tools. Depending on your application and your exposure, I hope this makes it easier to choose the tool most relevant for your needs. **END.**
