

You said it...

the magazine's editorial team addresses authors' queries—most of the time:-)

However, the magazine can improve, for sure. I have a few suggestions in this regard. It would be great if in place of thematic content, the CD bundled with the magazine has regular software or packages, like multimedia applications, office tools, etc. Also, it would be good if you provided some wallpapers/themes/cursors/icons, etc on the CD.

Another change that I would like to suggest relates to the FOSS Yellow Pages feature. I feel this section should be included as a separate supplement instead of taking up a lot of the magazine's pages.

The LFY website also needs to be updated more often. Do consider placing content from the LFY Facebook fan page in the magazine.

—Sufyan Bin Uzayr, romeo.without.a.juliet@gmail.com

ED: Dear Sufyan, thanks for your detailed feedback. We have taken note of your suggestions regarding the CD and I will pass it on to the concerned team. As regards Foss Yellow pages, we have already reduced this feature to one page.

Introduce more series-based articles

I really like the articles on new concepts and technologies that are regularly published in the magazine. The regular columns, like *The Voyage to the Kernel*, *Code Sport*, *CodeChef* and *Tips & Tricks*, along with the reviews of the latest distros also make for interesting reading.

I would want the team to consider introducing more regular columns on languages like C, Cpp, Python, Java and its advanced concepts. Articles on embedded systems, bootloaders and VLSI design also should appear more regularly.

—Raghavendra Nayak, raghavbnayak@gmail.com

ED: We are glad that you like the magazine's content. Regarding starting a number of new series on the topics mentioned, I have conveyed your ideas to the editorial team

for consideration. If you too would like to take up writing for any series, do let us know.

A few suggestions regarding the LFY website

I really appreciate the magazine for its contents and the LFY team for being down-to-earth in the true spirit of open source. Way to go! The content is good and the DVDs add value to every edition. I have a few suggestions for the website, though.

The website is very heavy—too many bells and whistles. Perhaps you could offer a

'Lite' site with fewer AJAX/JavaScript-like distractions. Apart from this, your 'latest issue' link is also not updated in a timely fashion. I think it ought to be. It would also be good if you speed up the process of bringing (old) articles online using a robust CMS with good search capabilities. As regards the print version, I have a suggestion with regard to the screenshots that are published. Sometimes the screen shots in articles are not visually comprehensible. Perhaps you could cut down the number of screen shots but make sure that those that you do print, are legible.

—Gurudutt Talgery, gnt001@gmail.com

ED: Thanks for the positive feedback and suggestions for improvement. Your points regarding the website are valid. We will surely evaluate all your suggestions and work on those, keeping the user experience aspect in mind. Thanks again for your detailed review of the magazine and the website. And do keep writing to us on how we can make our magazine better.
