MyToday mConnector is a Middleware between a Database (any JDBC compliant DB) & SMSC (Short Message Service Center). It is installed within your corporate network, connects & **pushes / pulls** data from your DB, **personalizes** using a **pre-designed template** configured on the mConnector & sends it to SMSC for delivery to customers & track with detailed reports.

## Features & Benefits

- Easy Configuration with readymade configuration templates. No API coding required.
- Database heterogeneity ensures data can be pulled / pushed from variety of DB's including excel sheet.
- Schedule & Personalize SMS with contacts data & pre-designed templates
- Track delivered & undelivered reports.
- NDNC checks off due to its transactional nature.
