

Figure 1: The final design of the airplane

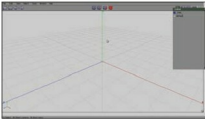

Figure 2: The default layout

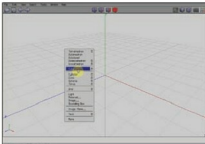

Figure 3: Click the RMB for context-sensitive menu, selecting cube

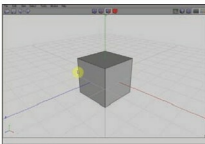

Figure 4: The left face is unselected

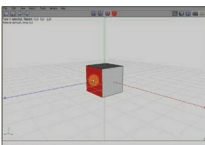

Figure 5: Click on the LMB; the face turns red

Key	Function
e	select edge mode
v	select vertices mode
f	select face mode
b	select object mode
l	select edge loop (naturally enough, this only works on edges)
Shift+l	select region
i	select similar elements
Ctrl+Shift+i	invert selection
Ctrl+a	select all
space	deselect all selected elements
+	grow selection
-	shrink selection
F3	select next edge loop
F4	select previous edge loop
F5	select all faces with 5 or more vertices (very useful)
