

DISCUSSION BOARD

Shrishendu Bhowmick:

I would like to know the names of the 5 best Linux distributions other than Ubuntu, Kubuntu, Fedora and Sabayon?

Like · comment

Saikat Basak: Try OpenSUSE, Debian, Mint, CentOS or ARCH. However, I would advise that you go for the last one only if you are an expert..

Shrishendu Bhowmick: Yes, I am an expert :-). So does ARCH consist of the KDE desktop? And what about PC Linux OS?

Ajeet Singh Raina: Shrishendu, that depends on what you are really looking for.

Mahesh Patil: While, OpenSUSE is good for easy configuration, Mint and PC Linux OS are known for better user interfaces. Please specify your requirement, so that we can suggest accordingly.

Shrishendu Bhowmick: I am a developer, I need an OS which is an all-rounder, something other than Ubuntu, Kubuntu, Fedora or Sabayon

Vineet Sharma: Try out Centos, Slackware, Debian, Mandriva or PCLinuxOS.

Dinesh Kumar:

Which Linux software is the best for use?

Like · comment

Sandeep Amileni: Ubuntu

Axel Dee: I completely agree with Sandeep!

Ajeet Singh Raina: Every Linux has its own charm! Although Ubuntu is growing like anything, I have personally started falling in love with Mint and Puppy Linux :-)

Dinesh Kumar: I am using Mandriva. I hope it's good for you.

Shubham Thakur Sehnia: Ubuntu definitely!

Ameya Biwalkar: For desktop, go for Linux Mint and for server, it would be preferable to use either CentOS or Fedora, Debian or even OpenSUSE

Rajnish Singh:

Can anyone guide me on how to customize our bootable Ubuntu disc to avoid installing VLC again and again via Internet?.

Linus For You: Try out these links for the following.
UCK - <http://www.linuxforu.com/2011/05/about-live-cds-how-to-cut-a-live-disc-using-uck/>
Remastersys - <http://www.linuxforu.com/2011/05/how-to-remaster-ubuntu-to-get-a-customised-distribution/>

Rajnish Singh: Thank you! This information is quite useful.

Ludy C Vandroux: I am a beginner in Linux. Being a newbie, I am not being able to install the software for playing games on Facebook. Gnash is obsolete for that. Please help me!

Like · comment

Ajeet Singh Raina: I use Firefox 3.5.2 and Flash 10.0.32.18, which is the latest I can get with Genbox and play plenty of games. So you can try these out.

Sachin Hegde:

I am new to Linux and am using Ubuntu 11.01. I need help in installing tar.gz and zip files. Whenever I download any software for Ubuntu, I either get a .tar.gz or a zip file. Then when I extract that file, I don't find any extensions like .exe in Windows. What do I do?

Like · comment

Sandeep Chandra: Since you are new to the Ubuntu environment, it is advisable that you use the add/remove software utility; else you could also use apt-get install from bash

Mrinal Bhattacharjee: Just for your information, the softwares for Ubuntu are in .deb format.

Zeez Shooter: I urgently need help with this! After installing Mint 12 KDE I found that all my five partitions were gone and the remaining one, the (C) partition had expanded to occupy the whole disk space. Please let me know if there is any way to recover my partitions because it contains important files of mine. Thanks!

Gonzalo Navarro: I would suggest a combination of iptables and such. Check Google, or in IRC of slackware, gentoo, arch, etc. This would help you..
