

The Art of Illusion

Creating Digital Art the Easy Way

Part—2

Creating good looking digital art does not always need expensive professional software. You can try your hand at 'The Art of Illusion', a free and open source 3D modelling and rendering tool.

In the first part of this article we covered what *The Art of Illusion* is about. We learnt how to create profile curves and tables. Now it's time to create a wall, add texture to the created object, and finally compose the scene before setting up the lights and rendering. So let's start with creating the wall.

Creating the wall

Creating our wall is as simple an affair as creating our table. The Boolean function of union was used to join all the legs of the table to the top. A similar Boolean function could be used but instead of union, we will use subtraction to create the opening in the wall that is to be our window. Go ahead
