

YOU SAID IT

Inspired by Codesport!

The 'Codesport' column in the February 2012 issue of *LINUX For You* was extremely nice and motivating. The tips featured in the column on how to prepare for programming interviews were inspiring. Thanks for publishing this column!

—Suhail,

via www.linuxforu.com

ED: It was a delight to go through your note. We are glad that the tips provided were useful and inspiring for you. Our purpose is served! We would certainly be conveying your words of appreciation to the author of the column, Sandya Mannarswamy.

Accolades for 'The Top 10 Security Assessment Tools'

The article titled 'The Top 10 Security Assessment Tools' that was carried in the ninth anniversary special issue of *LFY* (February 2012) was great. It was the perfect collection of tools for admins to address network vulnerability issues!

—Ameya Bivalkar,

Via www.linuxforu.com

ED: Thanks for the praise. We are thrilled to know that you found the collection of tools useful. We will certainly convey your compliments to the author, Prashant Phatak. He had compiled the list based on the popularity, ease-of-use and functionality of the tools.

Do include the latest penetration testing distros!

I am a student, studying in the 11th standard and am a big Linux

enthusiast. I have been a reader of *LFY* since a very long time. I must say, the discs provided with every issue are mind blowing. They have been of great use to me.

However, it would be splendid if you could include some of the latest penetration testing distros too in your forthcoming editions. A few distros will easily fit on a dual layer DVD. A short tutorial or review on each distro in the magazine will also be very useful.

I hope you will consider my request.

—Atharv Patil,

atharv.patil@gmail.com

ED: We do appreciate your praise and candid feedback! Your idea sounds great and we are certain that it would benefit several other readers of *LFY* as well. We will be discussing your suggestion with our tech review panel and editorial team. However, it might also interest you to know that we had bundled one such penetration testing distro on *Backtrack 5* in the August 2011 edition of *LFY*. Hopefully, you will see more such distros with the accompanying tutorials in the future issues of the magazine. Do keep sharing your valuable feedback with us.

A section for Tips & Tricks on the LFY website

I would like to make a suggestion. The 'Tips & Tricks' section published in your magazine can be viewed only by those who either purchase or subscribe to *LFY*. The same content isn't available online, unlike other important articles and discussions regarding *LFY*.

So it would be great if you could upload a section exclusively on 'Tips & Tricks' on the *LFY* website that could be available for everyone.

—Sudhir A V,

av.sudhir@gmail.com

ED: Your suggestion is an extremely valid one. We appreciate your concern. We agree with the fact that having a section devoted to 'Tips & Tricks' on our website, www.linuxforu.com, would make it even more accessible to several FOSS lovers. We will explore this idea, along with our tech review panel and online team, and try our best to upload such a section on our website www.linuxforu.com.

Thanks and do keep sharing your valuable feedback. It really helps us to improve and make our readers' experience better!

The Stallman interview is now in Tamil!

I would like to inform you that I have translated the interview with Richard M Stallman that was carried in the March 2012 issue of your magazine into Tamil. I have published the interview on my blog and here's the link to it: <http://bit.ly/xrPNU0>.

I really hope you have no objection regarding this.

—Srikrishnan,

srikrishnan2003@yahoo.co.in

ED: Thanks for informing us! We have no objections to this at all, as long as you give credit to the original source. In fact, we appreciate the fact that efforts
