Niam: The first Indian company to launch Ubuntu laptops and PCs

Niam Computech claims to be the first Indian firm to have launched a range of Ubuntu laptops, PCs, mini PCs and servers, and it does not have any Windows variants either.

Before the company launched its Ubuntu Mittal, chief executive officer, Niam Computech Pvt Ltd, reveals, "We did a survey at software companies in the NCR and Bengaluru. The overall response was positive and we concluded that end users want a machine that is beautiful, affordable, user friendly and stable."

The products will be available through electronic retail chains, retail distribution channels, VARs (for SMEs and enterprise), and through the company's online shop. The company is planning to make the products available in Q3 2012 around the festive season. Mittal said, "We are expecting to sell 1000 units in the first quarter after the launch."

Zync's new Android 4.0 tablet with voice calling

Till now, whenever a low-end tablet was launched, prospective users would first check whether it supported voice calling and if it had a rear camera. Most often, they would be disappointed. Zync Global Private Limited has, however, listened to its customers and included both these features along with 3G support in the Zync Z-999 Plus.

The Z-999 Plus is feature-rich and comes with a screen guard, a lycra sleeve and a pair of earphones, along with a mini USB connector cable and a charger. So, all you need to do is insert your SIM card, be it 2G or 3G, to start toying around with your new Android buddy. Based on a 1.5 GHz single core ARM Cortex A8 processor with 512 MB RAM, it runs Android 4.0 a.k.a. Ice Cream Sandwich.
