Chirag Kansara:

Hello friends, can you help me out in Ubuntu 12.4 desktop edition install with Windows 7 ultimate edition on my notebook. So tell me how to reset my master boot record entry in for single OS use (Windows 7) to run smoothly.

Like · comment

Bhavin Mistry: First install Win7 on your laptop with at least 3 partitions, and then install Ubuntu 12.4. Once you install it, just open terminal in Ubuntu & run "sudo grub-update."

Rakesh Kumar Aavula:

Please recommend Linux distro for my old laptop : IBM T43, Specs are 1.86 Hz Intel Pentium and 1 GB RAM

Like · comment

Azad Ansari: Ubuntu 10.4

Mohana Rao SV: DSL

Cody Stephenson: Ubuntu, but switch to fluxbox/openbox for GUI. Xubuntu is a less resource intensive window manager/desktop environment if you don't know how to change the window manager. It still should all be easy to set up though.

Bhavin Mistry: Ubuntu 12.04 or Ubuntu 10.04.4 LTS (recommended), with 1 GB of RAM works fine with GNOME 2. But if you want more performance, you can also use XFCE desktop. You can also have both the desktops, and can switch between them.

Rakesh Kumar Aavula: Thanks all! Will try with Ubuntu 12.04 and with lower GUI like XFCE.

Siva Prakash:

Which link to download .rpm format software for Redhat?

Like · comment

Jatin Khatri: Have a look at <http://rpmfind.net/> or <http://rpm.pbone.net/>

Thiagarajan Varadharaj: Instead of looking rpm one by one for all packages, make a yum repo. It will help you to install packages using single command. Have a look on following link, it may help you out. <http://tutarticle.com/technology/rhel6-yum-server-configuration>.

Jimit Shah:

Is there any free tool available to make bootable USB from Ubuntu to install some other Linux Distro?

Like · comment

Sai Prasad: Use unetbootin to make a bootable USB. It is available to Windows as well as Linux. You can get it from sourceforge.net.

Jyothish Jose:

Hello geeks i want to go for a linux certificate training. It should have good demand in the market and should have demand in the future also.

Aboobacker Mk: Why not RHSE

Jyothish Jose: @Aboobacker Mk: RHSE or RHCE?

Jatin Khatri: RHCE

note id Lv

Note Id Lv: RHCE

Aboobacker Mk: RHCE , Sorry for spelling mistake.

Jyothish Jose: Thanks to all. Can u suggest any good training centres in Bangalore?

Thiagarajan Varadharaj: CMS Bangalore (Jayanagar)

Arun Laluz Sadanandan Vbz:

How to solve the resolution problem in RHEL6?

Like · comment

Thiagarajan Varadharaj: Give a brief about your issues. If its just resolution problem, you can adjust the setting navigating by display settings.

Pradeep Singh:

What is the difference between ipython and python?

Like · comment

Aboobacker Mk: Pyhton is a programming language, ipython is one of the interactive shell for python.
