

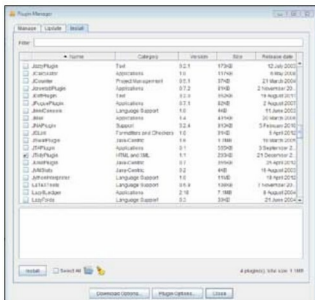

Figure 1: Plug-in Manager

which discourages many users. Besides, being written in Java, it tends to run slow on slower machines. Being a cross-platform tool, the GUI is not 'native' to different operating systems. Last, RAM consumption may be a problem on older systems.

Verdict

An editor is rated by how integrated it is, and *jEdit*

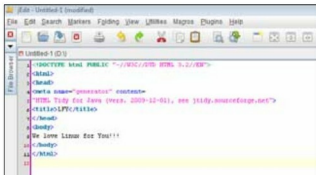

Figure 2: Titled code

proves it to be one by providing a feature-packed, programmer-friendly environment—it can truly be called a 'Programmer's Text Editor'. **END**
