

on-demand, Web apps, and of course, TV programmes. The Lenovo K91 smart TV runs on a 1.5 GHz Qualcomm 8060 Snapdragon processor, which is likely to be fast enough to play 1080p movies and to run casual games.

Lenovo has given the K9 a pretty decent design, but it still does not seem to be competing with the televisions offered by Samsung or LG. The company has used a 139.7-cm (55-inch) IPS LCD display, which is likely to reproduce great colours at wide viewing angles.

Android-powered car stereos and rear-view mirrors

Rydeen, a California-based automobile technology company, is developing a double-DIN stereo head unit that runs Android 2.2 Froyo. The tech specs of the Rydeen DV621 multimedia receiver include a 15.7 cm (6.2-inch) WVGA TFT touch-screen, an ARM Cortex A8 1 GHz processor, GPS, an in-built 4-channel amplifier with 45W per channel, dedicated sub-woofer output, and RCA audio connectors.

Optimised for drivers, a finalised version of the mirror with a simplified interface is expected to be out by 2013.

Now you can easily track your stolen Android tablet!

Absolute Software announced the launch of its theft tracking software for Android tablets at the recently held International Consumer Electronics Show 2012 held in Las Vegas from January 10-13.

One of the most commendable features of the software is 'Device Freeze', which allows its users to lock their tablet devices remotely. After the device is locked, a message is also displayed on the screen. The 'geofencing' module of the software helps in establishing virtual geographical boundaries. As soon as the boundaries are crossed, the software issues an alert on the tablet. When an Android tablet loaded with this software is stolen, the theft recovery team of Absolute Software can collect information and establish the location of the device, and pass on the information to the local police.

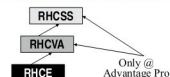

Computrace Mobile provides businesses and private owners a system overview, so that the users can respond quickly in any emergency situation. However, the software is currently only available on one Android tablet, the Lenovo ThinkPad. Users can buy the recovery package from the Absolute Software website, which allows users to download a free 90-day trial version after registering with Computrace Mobile. The subscription for Computrace Mobile starts at £12.95 (Rs 1017) per device for one year.
