## Dealers & Distributors Solicited

Hundreds of dealership opportunities await you at **Electronics For You Expo 2012**.

**Electronics ForYou expo 2012**  
Innovate. Design. Manufacture. Source. 16 to 18 February 2012  
Pragati Maidan, New Delhi

**16 to 18 Feb 2012**  
Pragati Maidan, New Delhi

Book your tickets and hotels to ensure that you're there for this mega event.

An **EFY GROUP** EVENT

## FOSS APPS SPECIAL

### Android smartphones can be document scanners too!

You can use your Android device as a document scanner, with the help of an app

called CamScanner. It is a free Android app that converts your smartphone into a scanner, and digitises a paper document using your smartphone camera. The app also has features like cropping, image enhancement and the ability to create a PDF from your scanned files.

CamScanner also allows the user to upload documents to the cloud and manage them by tagging or searching. With this app, Android phone users can manage their written notes, business cards, memos and magazines at one place, and carry them anywhere.

With the app, users can also back up their files to an SD card, so that they can be restored at any time. The app can reduce file sizes of PDFs and other files. The free version of the app has advertisements, a watermark on the PDF, and a limitation of 50 documents.

### New Android app released for JFK traveller

SmartPark JFK, a full-service JFK Airport valet-parking facility for those travelling through this New York airport, has launched a new app for Android smartphones. It provides users convenient access to the SmartPark JFK parking reservations system via their phones. In short, this new app appears to be changing the way travel plans are made. The SmartPark JFK Android app is functional now, across a wide range of Android handsets.

### Vimeo for Android

Vimeo has launched its application for the Android market, which will allow users to upload, manage and watch their

Vimeo videos right from their mobile phone or tablet. The Vimeo Android app makes it possible to view personal preferences or curated channels. It is worth mentioning here that Vimeo has been voted among the top 50 websites for the last two years by *Time Magazine*.

The only minor hiccup is that the app will work only for Android 2.3 or above. Some of the features that you can enjoy include watching and managing all existing Vimeo videos, and downloading them to your camera roll, quickly searching for videos on vimeo.com, pausing and resuming uploads, etc.

### Open sourcing WebOS to help doctors!

A research associate from Stanford University's Department of Radiology has developed an app on WebOS, which remotely operates an MRI scanner. The app enables the doctor to view the MRI images captured on a TouchPad tablet.

Because of their magnetic field, MRI machines do not work well with ordinary metals. But the TouchPad proved to be capable of dealing with MRI machines, since it is mostly made of plastic, and the metal used in the device can be easily removed. Andrew Holbrook, the researcher, used the open source WebOS to create this low-cost remote control device.
