

2. HTC Sensation XL

Both the smartphones under the HTC Sensation brand name, the XE and XL, became a rage as soon as they were launched. The company markets the HTC Sensation as a multimedia superphone in the palm of your hand. On-demand movies look great with a stunning qHD display, and they sound crystal clear with Hi-Fi audio technology. The HTC Sensation also includes an immersive HTC Sense experience, making this phone easy to use and a top entertainer. The premium design, complete with contoured glass edging, feels great in your hand.

The HTC Sensation XL, being the latest model, is grabbing more eyeballs these days. It runs Android 2.3 Gingerbread. The handset sports an 11.9 cm (4.7 inch) display, and is powered by a 1.5 GHz Qualcomm processor. It sports an 8 MP rear camera with dual-LED flash, and a 1.3 MP front-facing camera. The smartphone is loaded with Beats Audio technology for a better audio output. It comes bundled with a pair of earphones as well. The phone has a 3.5 mm headset jack, stereo FM radio with RDS, 768 MB of RAM, 16 GB of internal memory, a microSD card slot and up to 32 GB of expandable memory.

3. HTC Incredible S

The HTC Incredible S is an alluring smartphone that combines cutting-edge design with a premium mobile experience. Users can capture and view HD video. It has a bright 10.2 cm (4 inch) WVGA Super LCD display and stereo surround-sound resulting in a vibrant cinematic experience. The HTC Incredible S also takes high-quality pictures with its 8 MP camera with dual flash, and it easily enables videos, photos and music to be shared from the handset directly to a TV using DLNA technology. The HTC Incredible S includes an industry first with the orientation of the Virtual home, Menu, Back and Search function keys automatically shifting, based on how it is held. Add to this a premium Hi-Fi experience with dual microphones, noise cancellation, surround sound and HTC Sense, and one gets a smartphone that sets new benchmarks in mobile entertainment.

Price: ₹ 26,299

4. Samsung Nexus S

The Samsung Nexus S has many achievements to its credit. The device became a rage in India even before it was launched. Nexus S features a 10.2 cm (4 inch) Super Clear LCD, the Android 2.3 OS, a 1 GHz processor, NFC, a 5 MP rear camera and a VGA front camera. The device comes with a plain vanilla build of Gingerbread, and will be the first to get Android updates, until the next Nexus device is launched. Nexus S is the first device to feature Near Field Communication hardware, which allows users to read and write NFC Tags. NASA reportedly used Google Nexus S in the final human-manned program on the space shuttle Atlantis.
