

CODECHEF

The CodeChef.com Challenge, your monthly dose of coding puzzles from India's biggest coding contest, is now in print!

Hi and welcome to the *CodeChef Puzzle Challenge* sponsored by **LINUX** For You and *DirectU*! Solve this month's puzzle and you stand the chance of becoming one of the three lucky people to win a cash prize of Rs 1,000 each!

The January edition's puzzle

Jignesh can paddle his boat at 7 kmph. The river flows at 3 kmph. The moment Jignesh starts to paddle upstream, a fisherman loses one of his fishing hooks in the water 14 km upstream from Jignesh. How much time does it take for Jignesh and the fishing hook to meet?

The solution

2 hours

How did we do it?

Jignesh can paddle his boat at 7 kmph and the river flows at 3 kmph. Given that Jignesh paddles upstream, the relative speed of Jignesh = $7 - 3 = 4$ (kmph). The fisherman loses the fishing hook 14 km upstream from Jignesh. Since the hook flows with the river, the speed of the hook is also 3 kmph downstream. So the relative speed of the hook and Jignesh = $4 + 3$

= 7 (kmph).

Therefore, the time taken to cover 14 km @ 7kmph = $14/7 = 2$ hours.

And the winners this month are:

- Sumit Verma
- Mani Singh
- Amrit Kumar Biswal

Your CodeChef Puzzle of the Month

There are 10 baskets containing walnut cookies. Of these, 9 baskets contain cookies, each weighing 10 grams, and one basket contains cookies, each weighing 20 grams. Every cookie looks identical and there are plenty of cookies in all the baskets. Since we don't want to eat broken cookies, the baskets cannot be lifted or moved. There is a digital weighing machine which is allowed to weigh the baskets only once. How will you find out which basket contains the heavier cookies?

Looking for a little extra cash?

Solve this month's *CodeChef Challenge* puzzle and send in your answer to codechef@fyindia.com or lly@codechef.com by February 15, 2012. Three lucky winners will get exciting prizes, both in cash and merchandise! You can also participate in the contest by visiting the online space for the article at <https://www.facebook.com/LinuxForYou>

About CodeChef: CodeChef.com is India's first, non-commercial, online programming competition, featuring monthly contests in more than 35 different programming languages. Log on to CodeChef.com for the February Challenge that takes place from the 1st to the 11th, to win cash prizes up to Rs 20,000. Keep visiting CodeChef to participate in the multiple programming contests that take place on the website throughout the month!
