```

Rather than create GUI elements programmatically, LispWorks also contains an Interface Builder, which is a tool to construct graphical user interfaces for Lisp applications. You can design and test each window or dialogue in your application, and the interface builder generates the necessary source code to create the windows you have designed; all you need to do is add callbacks to the generated code, so that your own source code is utilised. 

By: Vivek Shangari

The author is a hard-core hacker, if ever there was one. He always thinks programs, and holds a piece of code in his head all the time. His favourite past time is to stop random strangers on the street and start talking about the benefits of open source over proprietary software, till they agree to switch sides, or threaten to jump off the nearest building. Every now and then, he manages to talk a bunch of unsuspecting potential programmers into letting him train them in Lisp. He can be reached at vivek@codecraft.in.

Achieve your CAREER GOAL with World Class Certifications

- RHCSA
- RHCE
- RHCCS
- RHCA
- RHCDS
- RHCVA
- SUSE
- SOLARIS
- VERITAS

Enroll for RHCE and save Rs. 8,000/- on Training fee!
 And 4 gift coupons, each worth Rs. 1,000/- for Red Hat Virtualization (RHV10) and each RHV10 module (RHV101, RHV102, RHV103, RHV104).

Orbit One Offer!!  **Reduces the coupon or gift items to your credit. Redeemable in class payment.**

- Best Certified Red Hat Training Partner, South India for 3 times in row
- Second in South India in terms of number of RHCEs
- RHCE of the year-09, bagged by a COBS student
- SMO + RHCSA Every year
- 17 RHCSAs so far, the highest in India
- NOVELL Gold Training Partner and Novell Gold Solution Provider
- Consistent 90% passing rate in RHCE examination
- Undisputed leader in South India for Open Source Training

RHCSA+RHCE
 (Oracle allowed) @Rs.16,800/- (Flat fee 2nd attempt 90% 180/- only)

* Limited Period Registration Offer

Go Online to learn Linux Device Drivers

Core skills like kernel programming or Linux device drivers should be learned at a slow and steady pace for fully comprehending it, says Mr. Raghu Bharadwaj, a lead trainer on core Linux programming. Unlike normal application software learning where it is mostly restricted to functionality based learning, system programming involves deep understanding and analysis of issues like the Linux kernel and its subsystems. Your options to learn these skills are classroom based training, learning through experience, self learning through trial and error and through an effective online course.

While all other modes of training has its own merits and demerits, online learning is definitely a step ahead, especially for courses like this. Online courses gives you the comfort of accessing it 24x7 and lets you learn things during hours of focus and interest. Another important aspect is that it permits you to go through each session any number of times and fully understand each and every topic effectively.

Mr. Raghu Bharadwaj is a lead trainer at Veda Solutions, you can listen to his training videos on Linux kernel and device drivers at www.techveda.org
