

eWebGuru | Noida, India

eWebGuru offers shared hosting, reseller hosting and VPS on Linux and Windows environments.

Major Linux-based offerings: The company uses the CentOS distro in all its Linux servers. For VPS, it uses OpenVZ virtualisation. It offers VPS services only on Linux servers.

Open source tools used: The company basically manages its servers through the WHM and SolusVM panels, which are paid tools. However, for server firewalls, it uses CSF (ConfigServer Security and Firewall), and for server security and hardening it uses Mod Security tools, which are open source. For the database, the MySQL community edition is used and for scripting, it is PHP.

USP: eWebGuru is one of the fastest growing companies in the Web hosting sector and it is recognised for the quality of its support. It provides 24x7 local online support and its prices are the most competitive in the market.

GoDaddy.com | Scottsdale & Arizona, USA

Go Daddy offers various types of Web hosting solutions. 4th Generation Hosting (4GH) is its most affordable Web hosting solution, with clusters of load-balanced servers distributing the load across several servers in a cloud environment. Other types of solutions offered include virtual dedicated hosting, dedicated servers and managed hosting. Cloud servers, the newest offering from the company, combines convenient control panels, a strong infrastructure and frequently used features, like firewalls and load balancers.

Major Linux-based offerings: 4GH Web hosting, cloud servers and dedicated, virtual private and managed servers running CentOS, Fedora or Ubuntu.

USP: Go Daddy delivers world-class solutions and its 24/7 customer support guarantees help from a 'real person' when you need it.

Special mention: In 2012, Go Daddy was voted the 'Best Web Host' by About.com readers, capturing 90 per cent of the votes.
