Net4 India Ltd | Noida, India

Net4 offers the following types of hosting services on both Linux and Windows platforms (with and without database support): shared Web hosting, dedicated hosting, cloud hosting and managed hosting.

Major Linux-based offerings: PHP hosting, Java Tomcat, Ruby on Rails, Perl CGI, Python, CMS applications such as Joomla, WordPress, Drupal, etc. and MySQL and PostgreSQL for databases.

Open source tools used: The company uses open source monitoring tools such as MRTG and Cacti for leased lines, routers, switches, servers and network utilisation monitoring. The firm also uses Zabbix, an open source NMS to monitor its servers' health, checking the following parameters—CPU, RAM, space, I/O, etc. to ensure a proactive alerts system. Additionally, the company uses Linux-based software load balancers and open source software inventory management, i.e., OCS inventory, the open source version of the Xen/VMware server for virtualisation at testing and lab environments, the open source helpdesk ORTS, which is an ITIL compliant helpdesk system and the CentOS Yum repository for patch management for all CentOS Linux systems.

Leading clients: obcindia.com and psbindia.com in the banking sector; Alkem Industries, Glenmark Pharmacy, Apollo Hospitals and GTB Hospital in the health sector; Air India Express and the Air Force Association among the airlines; the Air Force Bal Bharati School, the CRPF School, and the Punjab State Board of Technical Education and Industrial Training (PSBTE & IT) in the educational domain. Its clients include several other leading companies like Daikin, Nirula, Pantaloon Retail India Ltd, Cellcast, JIL Information Technology Ltd, Aircel Ltd, Uniglobe, Parsvnath Developers Ltd, the Jaypee Group, DPLI (DLF Primer Life Insurance), Religare, ICICI Foundation, the Azim Premji Foundation, the Handicrafts & Handlooms Exports Corporation of India, Punjab Heritage and Tourism, etc.

USP: Net4 is the largest Web hosting company with over 90,000 websites hosted. Servers hosted are self-owned and managed in ISO 270001-certified data centres, with 99.99 per cent uptime guaranteed. The company also has truly unlimited data transfer and free usage reports, virus-free website hosting and 24x7 email and telephone support.

Special mention: The company received the 'Emerging India Award' from ICICI CNBCTV18 for the most promising IT company in India.
