

THE BEST ANDROID APPS FOR SCIENTISTS

Resources that list the best Android apps for scientists are difficult to come by. The author shares a list of such apps, which he has put together over the years.

Scientists have the following basic requirements—news, information, tools and resources. So I've listed the apps I found useful under two broad categories.

News and information

TED (Technology, Entertainment, Design): Scientists learn from others' mistakes, and are eager to know what others are doing. The TED app is for scientists and tech enthusiasts—it lets people access more than 1200 talks by some of the world's most remarkable people.
