

DISCUSSION BOARD

Yousfani Saad:
I want some Linux video tutorials from the basic level. From where could I get these?

Like · comment

Sav Sui: You can search on YouTube and Google. Here's a useful link, <http://linuxcourse.info/>. You can also check out <http://showmedo.com/video/tutorials/linux>.

Yousfani Saad: Thanks!

Fahmi Iddi: You can get Linux tutorials from www.torrentz.com also..

Hasnat Malik:
I need a topic (related to Networks) for my research. Any suggestions?

Aakash Narang: You can go for socket programming, which is actually about the making of client and server..

Manu Measore:
Hi! I'm trying to install Mandriva 2011.x86-64.1.iso but I can't create "live" usb, both Mandriva Seed and LiveUSBcreator failed. Please guide me in installing Mandriva.

Linux For You: Mdv images are hybrid ISOs. That means you can make a usb using the dd command. Check your ISO md5sum and verify with the md5 supplied md5sum on their official website. If they tally, run the following command as root to make a live usb:
dd if=/path/to/mgvmimage.iso of=/dev/sdX
...where X could be a, b, c, d... depending on your HDD order. It usually takes a few minutes.

Bajinder Bitta:
I want to install Fedora along Windows 7. I have the disc of Fedora 16 nd 15. How do I carry out this installation?

Like · comment

Gurinder Singh: Simply install it like other Windows. I have installed three Windows at the same time on my PC; Linux (Ubuntu), Vista and Red Hat.

Aakash Narang: You can either install a parallel operating system, the way we usually install Windows. You can also go for a virtual OS, using the VMWare player or some other softwares... You can try either of the two, but the first one is more preferable... Hope this helps :)

Shivam Sharma:
I would like to know how to install the VLC player in Fedora 16?

Thiyagu Rajan: Check out this link, <http://www.updatedlinux.com/how-to-install-vlc-media-player-for-fedora-15-and-fedora-16/>

Shivam Sharma: Thanks a lot!

Yousfani Saad:
Can you let me know how I can install Linux. I once tried downloading it from the internet, but could just download its image?

Like · comment

Astonishing Rahul: Burn that image in a DVD and install it just like you install Windows.

Ashvinsinh Zala: Could you suggest some tool that is available on Ubuntu for easy Gujarati typing?

Sukoon Serjal Strike: This link might help, <http://www.yo-linux.com/TUTORIALS/LinuxTutorialWebSiteConfig.html>

Garima Pandey: Thanks!

Sukhwinder Pal: I recently bought a SONY DVD Writer SATA. I have Seagate 500 GB SATA Hard Disk. I wished to install the Windows 7 in one Partition while I already had Windows XP in that Hard Disk. I gave the command to format one Partition but the DVD Writer erased my all the data and corrupted all my Partitions. Now I have lost my entire Hard Disk data. Please suggest an easy solution for recover my lost data.

Like · comment

Sukhdeep Sedha: Data recovery from formatted drive is difficult. I suggest you go for a professional solution.

Kapil Bodke: "Recover My Files" is a good data recovery software. It gives 99% good results. Check out this link, <http://www.recovermyfiles.com/>.
