

Figure 1: Default view

Figure 2: Toolbar

Figure 3: Toolbar 2

Figure 4: Profile curve for fruit

You have created your first object in Art of Illusion, as shown in Figure 6.

Don't be disheartened if it doesn't look as impressive as you wanted. That is because you haven't textured it as yet. Have a little patience; I'll show you how to do that soon enough. If you feel that its shape is too 'regular' and therefore appears artificial, you could even tweak your papaya by double-clicking it in the front viewport itself. This brings up the mesh editor. You could move around the points to shape the papaya as you want it to appear, as shown in Figures 7, 8 and 9.

Now, you might notice that your papaya object is

Figure 5: Profile curve for plate

Figure 6: Lathe option dialogue

Figure 7: The lathed papaya

called *lathed object 1*. Right click the entry; click *Rename Object*, and name your object 'Papaya'. One more thing might annoy you—the extra lining along the papaya, which is the profile curve you used to create the papaya. Right-click the *Curve 1* entry, and choose *Clear*. The curve is deleted. Go ahead and hide the *Papaya* object before lathing the basin. Similarly, lathe the profile curve you created for
