the fruit basin, and rename the lathed object 'Basin', 'Bowl', or whatever suits your taste, as in Figure 10.

Creating the table

Having created the papaya and the bowl, you might feel that something is missing. The bowl will contain

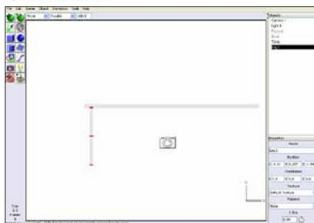

Figure 13: Creating the first leg

the papaya, but where do we place the bowl? The obvious suggestion would be a table. Yes! Go ahead and design a table to your liking. I will guide you to create the shape of a basic table, which you could refine later. But before you design the table, it would be best to hide your papaya and bowl. Under the **Object** menu, click **Hide Selection**. Now the viewport is clear for you to design the table. First, create a default cube.
