

YOU SAID IT

ED: Thanks for the words of appreciation. We shall convey the feedback to Manoj Kumar, the author of the 'Developing Applications on QT' series.

Nikhil, you can check out this link for a tutorial on QT
<http://bit.ly/x5IXTq>.
Hope you find it useful!

For 'Proprietary Solutions can't Milk Money from these Cooperatives':

The article 'Proprietary Solutions can't Milk Money from these Cooperatives', published in the January 2012 issue of *LFY* is very well written indeed. I am very happy to see how open source is helping the local people. I feel fortunate that I could contribute to the OpenLysaa software as a systems architect and project leader in launching

and implementing the first open source version. Kudos to the author, for the effort put in to bring such local software to everybody's notice! It's a very well written article.

—Douglas D Silva,

The article has been wonderfully written. Saving Rs 25 lakhs through open source is really great! It is mentioned in the article that "Finding manpower for its support has also been a constant challenge." With regard to this, I suggest that graduate students can help in conducting sessions on PHP or basic Linux operations. I am sure many students would be willing to do so.
