Sanjay Maddala:

How do we install vmware tools in Linux?

Like · comment

Phani Kumar Veluturi: Hi! This link might help: http://kb.vmware.com/selfservice/microsites/search.do?language=en_US&cmd=displayKC&externalId=1018414

Sanjay Maddala: Thanks Phani!

Aman Kapoor:

I am using kubantu in which the chmod command is not working. Please help me out!

Like · comment

Stephen Kozakewycz: Log in as root then try to alter permissions. Ctrl+Alt+F1 to go graphical then enter root password. Now chmod should work. Ctrl+Alt+F11 to switch backId=1018414

Prasad Mvdik:

Hi! I am a Linux user and I had a query. How do I uninstall a program from Linux?

Like · comment

Abhishek Rawal: In case you are working on Ubuntu, then follow these instructions: Go to software market -> installed softwares (there will be option on left side) -> click on uninstall. Restart the OS and its completely removed.

Vyshakh Pv:

How can we share internet access with VIRTUAL-BOX? (Host ubuntu10.10+ VB4.1 Guest Win XP)

Abhishek Rawal: Hi! These links might help. Check these out: <https://whyweprotest.net/community/threads/setting-up-tinyproxy-under-linux-debian-ubuntu-etc.69970/> and <https://help.ubuntu.com/community/Internet/ConnectionSharing>.

Arvind Iyer:

I installed Fedora 15. Now I find that the mp3 files here don't work.

Like · comment

Aman Kapoor: Try downloading fluendo mp3 plugin. It might work!

Stephen Kozakewycz: Open your terminal and run this line to enable livna and rpmfusion. After it is finished go to you synaptic (add remove software) and you can search ugly-gstreamer-plugin. <http://rpm.livna.org/livna-release.rpm> <http://download1.rpmfusion.org/free/fedora/rpmfusion-free-release-stable.noarch.rpm> <http://download1.rpmfusion.org/nonfree/fedora/rpmfusion-nonfree-release-stable.noarch.rpm>

Arvind Iyer: Thanks!

Stephen Kozakewycz: But in case that doesn't work for you, the better solution is `su yum localinstall --nogpgcheck http://download1.rpmfusion.org/nonfree/fedora/rpmfusion-nonfree-release-stable.noarch.rpm` <http://download1.rpmfusion.org/free/fedora/rpmfusion-free-release-stable.noarch.rpm> yum update. And that's for mp3, avi and other formats as well!

Goyal Ashwani:

My Linux machine doesn't catch eth0 i.e. LAN card. I installed CentOS 6 and also tried RHEL 6 but nothing worked. I have DELL Inspiron N4030. Could someone help me?

Like · comment

Sameh F. A. Abed: You can replace the LAN packages :)

Goyal Ashwani: Which package will do it then?

Phani Kumar Veluturi: Run this command, `'lspci -vnn'`. You should be able to see the list of installed hardware and LAN card model.
