The A-Z List Of Training and Certification Providers

Novell India | Bengaluru

Novell India offers various courses on SUSE Linux Enterprise 11. Some of them serve only freshers and include basic modules like 'Getting to Know SUSE Linux Enterprise' by experiencing some of the new features of SUSE Linux Enterprise 11, 'Getting introduced to the Linux shell and command line', Remote Access, 'How to enable fundamental network services', etc. Some courses are for the intermediate level and include modules like: 'Managing the Linux File System', 'Managing User and Group Permissions', 'Using Linux Text Editors', etc.

There are also ample courses offered by Novell that are suitable for freshers as well as those in need of mid-level expertise. The courses are offered via various delivery methods like classroom study (virtual or physical), self-study kits, on-demand, etc. The institute offers certification courses like NCLP, NCLA, NCLE, etc.

Professional customisation: Novell's courses are designed in a manner to help working professionals move from the administration level to core areas like development, engineering, R&D etc. For such requirements there is the Novell Certified Linux Engineer (NCLE) certification course. There are other advanced modules available as well that come with the flexibility for working people to take up.

Placement: Its students have been absorbed into almost all major MNCs and into the SMB segment as well. A good number of students have been hired by Novell.

Special mention: Novell has been a key player in promoting open source and has received several accolades in the GNOME project. Some of the awards that the firm has won include VARBusiness ARC Awards, where Novell Open Enterprise Server and SUSE Linux Enterprise Server took up the top two spots. Also Novell's Open Enterprise Server SP2 won the 'Best of Show' in the first LinuxWorld Conference and Expo in Sydney.

Did you know? These courses have been designed in collaboration with various partnering colleges/universities to provide training and certification that make the students ready for their jobs from Day One.
