

Raspberry Pi converts a keyboard into a computer

This tiny computing device is finding applications almost everywhere. The Raspberry Pi can be customised to fit in almost all spheres of computing, despite the fact that the device was built to provide an affordable yet functional computer for students to learn the basics of programming and software development. But there's obviously more to it than what meets the eye!

Now, a Cherry G80-3000 keyboard has been converted into a Raspberry Pi computer. Preamp is behind this Raspberry Pi project where, except for the HDMI port, just about every plug was moved to the back of the keyboard with the help of an Ethernet jack, a USB hub, and RCA jack. However, audio is missing in this portable combination.

You can try and convert your Raspberry Pi into an Internet radio, use it as a media centre and also to build your home's security system.

Mozilla releases Thunderbird 15 with live chat

The Mozilla Project has released version 15 of its open source Thunderbird e-mail client, and has added instant messaging support along with an

updated user interface and security improvements. Previously, developers had added support for instant messaging in Thunderbird 13 and 14, but had decided to disable it by default, to improve it. In Thunderbird 15, the supported chat network includes Facebook Chat, Google Talk, IRC, Twitter and XMPP/Jabber.

One of the unique features of Thunderbird 15 is its full support for the Do Not Track (DNT) header. The DNT privacy setting is a developing standard being used to instruct websites that the browser user doesn't want them to track their online behaviour. The new version also takes care of 12 security vulnerabilities. Of these, five are rated as critical by Mozilla and could be exploited by a remote attacker to execute arbitrary code on a victim's system, for instance.

Coming to the looks, developers have added a new menu and toolbar design based on the Australis theme in Thunderbird 15 to make it look more like upcoming versions of Firefox. The Filelink feature, used for sending large attachments, has also been updated and it now supports Canonical's Ubuntu One (U1) cloud storage platform. Thunderbird 15 is available for download for Windows, Mac OS X and Linux users. Also, you can use the built-in update tool or wait for the automatic update notification. The source code and binaries for Thunderbird 15 have been released under the Mozilla Public Licence 2.0.

STUDY GUIDE

RHCE SERIES

LINUX ESSENTIALS, SERVICES
& SECURITY

LEARN BY EXAMPLE

VIPIN GUPTA

Price: US \$40, India Rs. 650/-

This study guide starts from basics & takes you to advance levels of linux. everything has been explained by giving examples. Proper lab setup along with diagrams has been given so that you can construct the labs yourself & do the practice. It covers the course contents of RHCE. It is for those who wants to start fresh as well as who have done RHCT/RHCE

It is available in ebook as well as paperback format. paperback edit on is available only through direct order. For more details visit our website or email

About Author: Vipin Gupta is BE, RHCE, CEH, ASM, CCNA, MCSE, MCSA. He has got more than 17 years of experience in IT related fields. During his long career, he has been associated with various engineering colleges, polytechnics, private institutes & corporate sector.

Courses/Workshops

- Linux Administration
- Linux Security Specialist
- LMS using Moodle
- 1-Day/3-Day/5-Day Workshops

**we focus more on
knowledge than on
certifications**

**we also provide
virtual classroom solutions
for colleges/schools**
