

add a lot of content that is not directly related with Linux and which is useful to readers.

### Syed Anwaarullah, associate developer, Convergys

I think changing the name of the magazine to *Open Source For You* is better because it is more generic and will promote the magazine to a broader audience. After the name change, the magazine can cover a wide range of topics like Android, which is open source yet not directly linked to Linux. Android developers like me will be glad if you present more content on this growing section of open source technology.

### Prajod Vettiayattil, lead architect, Wipro

I am a regular reader of the magazine and have actually wanted to see this change happen for quite some time, because '*LINUX For You*' did not reflect the kind of

articles published in recent issues. Initially, the magazine was only about Linux, but now it is about a lot more. The changed name is more representative of the content you are publishing. It is also good for the target audience. The new title has much wider scope as compared to the previous title.

### Arun Tomar, open source evangelist

I think this will be a nice change as it will give readers a lot of technologies to mull over, ranging from the desktop and servers to mobiles, etc.

### Joel Divekar, general manager, Information Systems with People Interactive

*Open Source For You* is an initiative that gives a fresh and broader perspective to your organisation, helping it to spread the word on open source. This also helps explain that open source is not specific to any operating system or distribution. **END** 

## And here's what our Facebook community says:

#### Anant Shrivastava:

Reminds me of the RMS interviews you published in your initial editions when he pointed out some issues with the magazine's name and its impact. I, for one, support this change as this is what this magazine is about. It's not only about Linux, but the whole open source ecosystem.

#### Mohammed Shameem:

Good move. Rather than focusing on one project, i.e., Linux, the magazine can focus on all aspects of open source and hence the name change is apt.

#### Pradeep Prakhkar:

Yes, this name is more representative of the content we expect in this magazine—which leads open source enthusiasts towards overall growth. I am okay with the new name of the magazine.

#### Raghava Karthik:

Change the name to anything! We just need the magazine's content to remain as it is (of course, some new topics are welcome!)

#### Rakesh Mallick:

This is the correct name for the magazine.

**Harshad Joshi:** Congratulations for expanding the focus of the magazine from just Linux to all open source projects. I hope to see lot of content on Free BSD, Open Solaris (smartos) and other related technologies like the cloud. All the best. And do make the magazine thicker.
