Hanna Ben Salah:

Does anyone have any idea about SHELL?

Like · comment

Manoj K Nair: Shell is a software program that allows you to interact and access a computer system. User can enter commands in the shell prompt, which will be executed by the shell. Since the only means of communication through shell is text, it is known as Command-Line-Interface or CLI.

A shell is a command interpreter and serves as a user interface to the Linux kernel...<http://www.ibm.com/developerworks/linux/library/linx-shells/index.html>.

Hanna Ben Salah: Thank You!

Mohamed Abbes:

Can someone tell me how to download Linux?

Like · comment

Suman Karki: Linux has many distros, best to use is Ubuntu. Go to ubuntu.com and download its latest version and use.

Chandra Shekhar Pandey: You can also request online for Ubuntu, and within a fortnight you will receive the latest Ubuntu CD via courier free of cost. Go for it.

Keshav Mishra: But better one is Fedora, available at www.fedoraproject.org.

Chandra Shekhar Pandey: Ubuntu is the most popular among the lot. Lots of software to download and open source community support on your platform. Grab it.

Sumant Garg: If you are new to use Linux, I vote for Ubuntu. Chandra, free shipping has been closed now.

Mohamed Abbes: Thank You Guys!

Syed Muizz Ahmad:

Hi! In CentOS6, I forget the root password. Now I am in local user (not root). How can I reset my root password?

Like · comment

Mani Kandan: Boot in a single user mode and change the root password using `passwd` command.

Pradeep Praxhar:

How to configure IPv6 on the Cent OS 6.3?

Like · comment

Mani Kandan: 1. Set `NETWORKING_IPV6=yes` in `/etc/sysconfig/network`
2. Append following in `ifcfg-ethX` `IPV6INIT=yes`
`IPV6ADDR=<IPv6-IP-Address>`
`IPV6_DEFAULTGW=<IPv6-IP-Gateway-Address>`
3. Restart the network.

Thala Karthik:

I am new to Fedora. The video is not playing. What package should be installed?

Manu Kutan: Please download and install VLC Player for Linux...<http://www.videolan.org/vlc/download-fedora.html>.

Thala Karthik: Thank you Manu!

Karthigeyan Kith:

Hi, How to find out the password of root in Boss linux for a new computer?

Like · comment

Mani Kandan: If you want to reset the root password, boot in single user mode and change the password using `passwd` command. Check the link for details
http://wiki.bosslinux.in/wiki/index.php/Lost_Password

Nilesh Chandekar:

Need help. Suggest a good OS to make it as a firewall. How can I have a profound knowledge about Firewall?

Like · comment

Spencer Allen: I've never done it but my best guess would be FreeBSD or arch.

Nilesh Chandekar: I mean to say standalone firewall OS and I need study material also.

Mani Kandan: Seven of the best linux firewalls.. check it <http://www.techradar.com/news/software/applications/7-of-the-best-linux-firewalls-697177>
