Postgres Enterprise Manager

Enterprise PostgreSQL Database Management

Postgres Enterprise Manager enables DBAs to efficiently manage, monitor, and tune more Postgres servers en masse from a single console, than any other tool.

Postgres Enterprise Manager (PEM) Architecture

Feature Highlights:

- **New: Web Client**
Access monitoring console from any browser enabled device
- **New: Log Manager**
Configure logging en masse and view a consolidated dashboard
- **Capacity Manager**
Provides trend analysis for storage and hardware plans
- **Audit Manager**
Configure and manage audit logging in Advanced Server

- **Monitor Performance**
Dashboard for I/O, storage, memory, user activity & more
- **Alert Management**
Pre-defined & custom alerts notify you by SMTP or SNMP
- **Postgres Expert**
Helps enforce best practices with expert suggestions
- **SQL Profiler**
Efficient troubleshooting and optimizing of slow SQL
- **Team Support**
Create views/access to database servers on the network by roles

Postgres Expert:

- **A 'DBA-in-a-Box'**
- **Detects Best Practice Deviations**
- **Provides expert recommendations to optimize performance and operations**
- **Scans Critical Areas**
 - Security
 - Schemas
 - Configuration
 - Much more...
- **Creates HTML Reports based on Findings**
