

YOU SAID IT

beyond Linux. To keep pace with the changing times, we decided to rename our magazine.

Kudos to OSFY!

This is to congratulate you about the new topics and technologies being discussed in every issue, which reflect your team's hard work. Keep up the good work.

—Saket Sinha,
saket.sinha89@gmail.com

ED: It's great to get such encouraging words of appreciation from you! We are really glad to know that you feel this way and have taken the time to write to us about it. Our authors too deserve the accolades, for they come up with the new and interesting topics for OSFY readers. Keep reading our magazine and do let us know more about what you feel about its content.

Include articles on Virtualisation

Magimai Prakash: I follow OSFY on a regular basis, and so far the articles covered in your magazine have been really good. I expect more content on virtualisation as it is one of the hottest and fastest growing areas of IT. Articles on this subject will definitely be of use for those who want to make a career in this fast-evolving domain. It would be wonderful if you could publish interesting articles on the same on a regular basis.

Linux For You: It's great to get feedback from our readers on what kind of content they wish to see in our magazine. We do agree with you, and you will definitely see more content on virtualisation in our forthcoming issues.

Articles on Android Apps Development

Chaitanya Kumar: OSFY's team effort in coming out with good articles is commendable. Please publish more content on Android apps development and its security.

Linux For You: Thanks for the feedback. Android apps development is indeed a hot topic, and so is the security of Android devices. You can expect more articles on both these topics in future issues.

Where do I get OSFY in Kerala?

Manu M Das: The OSFY issue for November is still not available on the stands at Kollam, Kerala. Please let me know how I can get a copy.

Linux For You: Hi Manu—There is a distributor of our magazine in Thiruvananthapuram, Kerala. You can get in touch with him—Hari Kumar of India Book House, Thiruvananthapuram at 0471-2475443. Hope this helps.

Manu M Das: I know the India Book House at Thiruvananthapuram as I visit it regularly and so will collect my copy from there. Thanks a lot for your reply.

Android rules!

Amit Mittal: I am really happy that you are carrying a lot of Android-based articles in your magazine. These have been very helpful for me and all those who want to make a career in Android apps development.

Linux For You: Thanks a lot Amit! Android is the open source champion and in our future editions, too, you will continue to see a number of articles on Android. All the best for your future endeavours!

Loved reading 'System Programming Using POSIX Threads'

Gaurav Sinha: I loved reading the article 'System Programming Using POSIX Threads' published in the November 2012 issue of OSFY. I got to know about yet another role of GDB. Thanks OSFY!

Linux For You: We are happy to know that you liked the article. We will convey your words of appreciation to the author, Swati Mukhopadhyay. We will also try our best to include more such articles.
