

A List Of Network Storage Solutions Providers

Dell | Bengaluru, India

Dell helps customers tackle challenges like handling data volume growth and managing IT budgets by standardising IT infrastructures, simplifying operations and automating processes. Dell Compellent, Dell EqualLogic and Dell PowerVault are the storage solutions offered by the company, along with other Dell storage tools and utilities that can help organisations of any size derive the full value of their IT investments while protecting vital enterprise data, ensuring high business continuity, and maintaining high flexibility and scalability. Dell PowerEdge servers running Linux, compared to proprietary systems, can deliver lower TCO, increased flexibility and reduced complexity.

Digital Track Solutions | Chennai, India

The company offers a myriad of network storage solutions like NAS, SAN and Unified Storage. The company is also into network storage consultation, proposing suitable storage and back-up solutions.

HP | Bengaluru, India

HP offers a full range of NAS solutions including the X1000 G2 Network Storage Systems for small and medium IT environments, the X3000 G2 Network Storage Systems that add IP-based services to arrays and SANs, the X5000 G2 Network Storage Systems for mid-sized companies with Windows-centric environments, and the X9000 Network Storage System scale-out solutions for enterprises. The NAS appliances are simple, cost-effective and offer a convenient way to back up Windows, UNIX, Linux or MAC clients and/or servers.

IBM | Bengaluru, India

IBM network attached storage (NAS) products provide a wide range of network attachment capabilities to a broad range of host and client systems. IBM Scale Out Network Attached Storage (SONAS) is designed to embrace and deliver cloud storage in the petabyte age. SONAS can meet today's storage challenges with quick and cost-effective IT-enabled business enhancements designed to grow at an unprecedented scale.

iValue InfoSolutions | Bengaluru, India

A premium technology enabler, iValue InfoSolutions drives adoption of cutting-edge technology solutions and offers services throughout the entire lifecycle of IT security, storage and managed enterprise wireless solutions. Storage offerings include SAN – IP/FC, NAS, VTL, storage servers, virtualisation gateways and cloud storage nodes.
