

You can 'Play' with this new tablet

Mitashi has introduced its business-cum-entertainment tablet—the Mitashi Play BE 100. It sports a 17.8-cm (7-inch) capacitive five point TFT touchscreen and is based on a 1 GHz processor along with 512 MB of RAM, and runs Android 4.0 (ICS). The tablet is based on the Cortex A8 CPU architecture clocked at 1.2 GHz and is powered by a Mali 400 GPU. The tablet PC sports a KB100 keyboard, which can convert the entire tablet into a laptop. The keyboard comes for an extra price of Rs 1,299. The company claims that, “The most unique feature of the Play is its accessory, the KB 100 Keyboard. This is a fully functional keyboard that will transform your Play into a one-of-a-kind workstation anywhere, anytime.”

This Karbonn phablet is for young geeks!

Karbonn Mobiles, the home grown handset maker, is in the race to bring out a low-priced phablet for Indian youngsters. Karbonn has quietly unveiled its latest Android phone but, this time, the company is offering the phone with a gigantic 15-cm (5.9-inch) display, dubbed as Karbonn A30. The A30 runs Android 4.0 (ICS) and sports a 15-cm (5.9-inch) display. The A30 is reported to sport an 8 MP rear camera and a 1.3 MP front shooter. The smartphone is backed up by a 2,500 mAh battery. Pradeep Jain, managing director, Karbonn Mobiles, said, “The Karbonn A30 is currently the biggest display phone in the country right now. We have entered the market with this product to set new benchmarks and help it grow in the right fashion.”
