

Instagram

Instagram is a fast, beautiful and fun way to share your photos with family, friends and peers. Snap a picture, choose a filter to transform its look and feel, then post to Instagram, and easily share it on social networking sites too—and it's absolutely FREE! You can transform your ordinary snaps into works of art your friends admire—and you can view what your friends post every day. The main features of this app include:

- Custom-designed filters and borders.
- Instant sharing on FB, Twitter, Tumblr and Foursquare.
- The ability to 'Like' and comment on the pictures posted by your friends.
- Full support for front as well as rear cameras.

The current version available is 3.2.0, and it requires Android 2.2 or above. The average rating of this app is 4.6.

Android Lost

As frequently happens, you leave your phone somewhere—perhaps even in silent mode, if you were in a meeting. And later, you can't remember where you left it. Besides the expense and hassle of getting a new phone, you might also have personal or business data on your phone that you do not want to lose. There's an app for that! Android Lost, developed by Theis Borg, helps you locate your misplaced Android smartphone. You can control your smartphone by just texting a custom attention message, and the app turns the ringer volume up, making your phone's ringtone audible (useful when your phone is in silent mode). It's also possible to get the exact location of your phone (through GPS). Simply text your attention word from any other cell phone, or from the Internet, to your lost phone. If it's been stolen, the pass-code

feature in it prevents the thief from uninstalling the app without prior notice to the owner. By remotely controlling

the phone through this app, you can retrieve the phone's IMEI number, set up call forwarding, read your SMSs and send them to your e-mail. You even have full Internet access (the app can create network sockets). What more could you ask from a free app?

The average rating is 4.6—very nice. The current version 4.0.4 requires Android 2.2 or above.
