

- Promoting models based on metrics
 - Triggering deployments
- A small workflow might look like:

Commit → Train → Log → Compare
→ Register → Deploy

Automation ensures:

- No silent model drifts
- Consistent experiment tracking
- Faster iteration loops
- Traceability across ML releases

Deploying MLflow models

MLflow models are packaged in a consistent format. You can deploy them using:

- MLflow's built-in REST API
- FastAPI / Flask wrappers
- Docker containers
- AWS SageMaker
- Azure ML

- Kubernetes (KFServing, Seldon Core)
- Once deployed, models can be monitored for:

- Latency
- Throughput
- Accuracy decay
- Drift in input data

MLflow works nicely with monitoring tools like Prometheus and Grafana, enabling observability.

Best practices for teams

- Version your dataset
- Log everything (model metrics, configs, environment)
- Use Model Registry for all

deployments

- Combine MLflow with CI/CD
- Introduce drift-detection monitoring
- Keep runs clean with tags and experiment names

MLflow has emerged as a foundational open source tool in the MLOps ecosystem. It brings order to experimentation, simplifies model versioning, and accelerates deployment cycles.

Whether you're training simple ML models or large LLM-based systems, MLflow provides a unified, transparent, and reproducible workflow, which is exactly what modern data teams need. **END**

The author has a master's degree in data science and AI. He has worked at Jaguar Land Rover and Samsung Research and is passionate about solving real-world problems in areas such as autonomous systems, transformer models, and recommendation engines. He frequently shares his knowledge at national conferences and forums.

Job Guaranteed.

You don't need a training institute. Just do it yourself.

WORK WITH OPEN SOURCE.

www.opensourceforu.com

Demand for Open Source is sky rocketing. Be it for managing IT infrastructure or development of software —Open Source experts are what organisations are seeking. Develop expertise in an Open Source stack, and watch your career graph zoom.

You don't need a training institute for this. You can do it yourself. And, Open Source For You can be your friend and a guide through this journey.
