96: -rw- 63455378 Dec 03 12:08 mohit.raj
```

Figure 3: `grep` command

This generates standalone executables in the `dist/` folder.
Step 3: Deploy to System32:

Run as Administrator

`copy dist\ls.exe C:\Windows\System32\`

`copy dist\grep.exe C:\Windows\System32\`

Placing the executables in System32 makes them available system-wide in any command prompt or PowerShell session without path configuration.

Advantages and limitations of creating these commands

Advantages

- Familiar UNIX syntax for cross-platform developers
- Lightweight and fast
- Easy to customise and extend
- No dependencies (compiled executables are standalone)

Limitations

- Windows permission model differs from UNIX; so permission strings are simplified.
- Some advanced `ls` and `grep` options are not implemented (can be added as needed).
- Large directory listings may be slower than the native `dir` command.

All the code has been placed at <https://github.com/mohitraj/commands>. Do check it out.

An "AWESOME" Development Board from India?

- **Super Small:** 3 centimeters
- **Super Smart:** 3 processors (Xtensa® Microprocessor + 2 ULP RISC-V Coprocessor)
- **Super Sensitive:** 5 Sensors
- **Super Connected:** Wifi & 10+ Interfaces
- **Super Flexible:** 30 GPIOs
- **Super Easy:** FPC + Dedicated Battery Connector
