

responsive they may be to new prices.

Insurance: Python can help insurance companies provide robust solutions for risk management, fraud management, personalised services, automation, customer support, etc.

Quantum computing: Organisations are leveraging quantum algorithms for complex problem-solving in cryptography and drug discovery, with Python serving as the primary interface for quantum programming.

Tech giants like Google, Netflix, Instagram, and Dropbox rely heavily on Python for ML and backend systems.

Innovative services powered by machine learning are already reshaping industries. Python developers have kept pace with this disruption by introducing cutting-edge libraries, frameworks, and approaches that simplify the adoption of advanced machine learning techniques. Businesses can now harness these tools to enhance performance, optimise operations, and deliver superior customer experiences with greater ease.

In essence, Python's steady evolution paired with its thriving ecosystem ensures that developers remain equipped to tackle modern challenges, from everyday coding efficiency to industry-scale innovation. Not only is Python part of the AI revolution, but it's also setting the pace. **END** 🐧

DIY KIT: NFC, RFID, IoT & Embedded Systems

Want to learn and master NFC and RFID technology along with an IoT-enabled embedded system?

This kit includes all the essentials to start learning or building RFID/NFC projects.

POWERED BY

IndusBoard
COIN

Super small sized development board that enables you to create solutions for many use-cases where small size is super important.

SPECIAL INTRO PRICE

₹1,999 (Inclusive of GST)
