You will be redirected to a blank web page.

Building and styling: The hands-on tutorial

Now, let us start building our blog site. Click on the '+' icon at the top left corner of the page to use the elements to decorate the page. You can see many blocks containing different types of elements under each sub-block, such as Basics, Media, Components, Forms, etc.

Let us first insert a text box for our heading. For that, under Basics (Basics can be accessed by clicking on the '+'

icon), drag the *Text* option and drop it on the page. Click on the textbox and type the title of the blog.

As soon as an element is created, we can modify its properties using the *Open style manager* available on the right corner of the screen (paint brush icon) as shown in Figure 4.

Now let us scroll through the *Open style manager*, and modify the margin and padding to 100 and 15 each, respectively. Then, let us insert an image and content for the blog. To insert an image, drag the *Image* option under the Media sub-block and drop it on the web page. We will get an
