

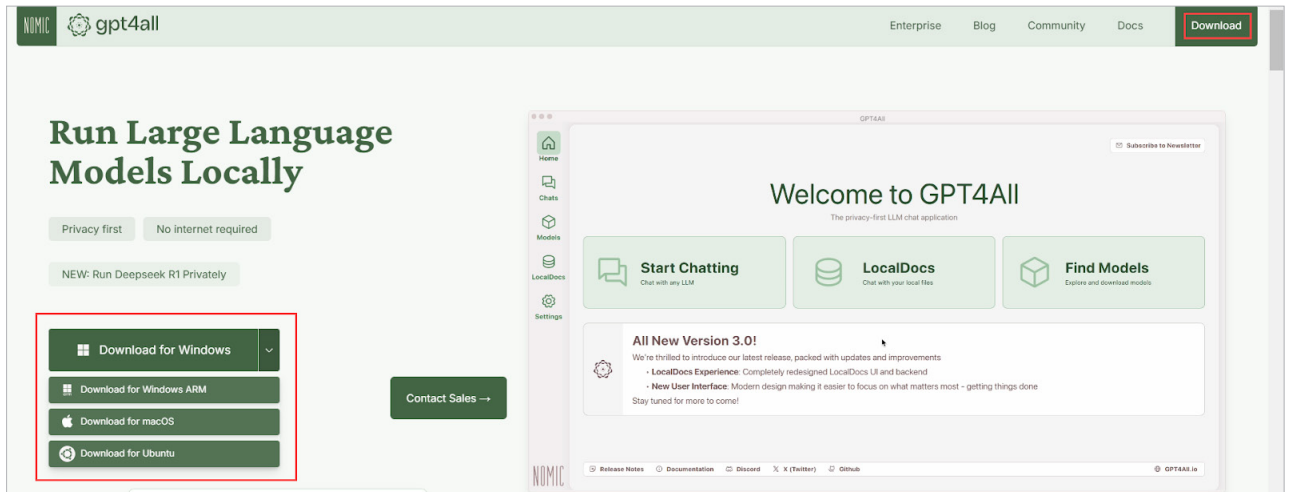

Figure 1: GPT4All

Summarisation: GPT4All can be used for quick and efficient text summarisation. This helps to clarify the core concept of large books/web pages without having to read the entire content.

Language translation: The offline capability of this tool can be utilised by travellers for quick language translation or to learn a new language

without worrying about internet connectivity.

Education and skill development: Students can use GPT4All for

educational purposes such as to learn new languages, analyse data, generate questions, simplify complex content, skill development, and much more. **END** 🐧
