

“OUR OPEN SOURCE SOFTWARE ENABLES DEVELOPMENT AND HOSTING WITHIN OUR CUSTOMERS' DATA CENTRES”

Andrea Wörrlein,
Managing Director, VNC

Swiss company Virtual Network Consult AG (VNC) aims to empower users with control over their data through its communication software stack, VNCIagoon, built on open source technologies. In a candid conversation with *OSFY's Yashasvini Razdan*, VNC's **Andrea Wörrlein**, Managing Director, VNC and **Bernd Rodler**, Community Leader, VNC, spoke about the company's focus on digital autonomy, community collaboration, and India's role in its operations.

Q. How would you describe VNC to a non-technical CEO of a prospective client?

A. VNC is a global company focused on developing a comprehensive software stack for communication and collaboration. Our team spans Switzerland, Germany, Eastern European countries, India, Pakistan, Vietnam, Dubai, the US, Canada, and Southern America. As our products are built on open source technologies, collaboration with community leaders worldwide is crucial. While our headquarters are in Switzerland, our
