

The common challenges faced while accelerating the usage of Open Source in Organizations

30% participants highlight **Security Concerns** as the top challenges organizations face

25% state **Lack of Internal Skillsets**

24% state that **Lack of Product Vendor Support** is also a commonly experienced challenge

21% state the challenge of **Compliance Requirement from Regulating Bodies**

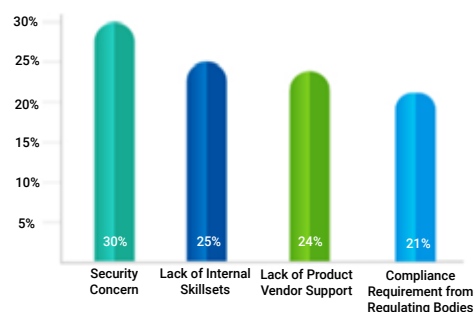

Figure 2: Common challenges

The NEW API Gateway Technologies that will be adopted in 2023-24

47% participants cite that **Google Apigee** will be their top choice of API Gateway

16% cite **Mulesoft**

12% choose **Kong**

7% choose **Axway**

18% are **Others** that comprise of AWS API Gateway, NGINX Plus, Gravitee

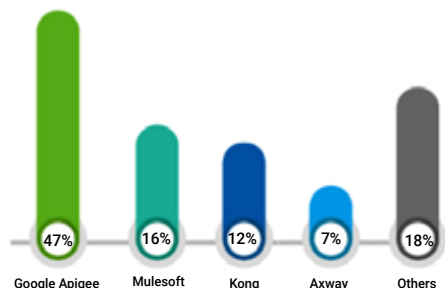

Figure 3: API gateway technologies being used

25% felt there is a palpable internal skills vacuum, which slows down the adoption trajectory. Vendor support, or rather the lack of it, was a pain point for 24% of those surveyed. And 21% were grappling with regulatory compliances, which somewhat hindered the full realisation of the potential that open source software promises.

Despite these challenges, there's a silver lining. Organisations are gearing up to confront these obstacles head-on, eager to integrate open source

solutions. A significant 52% were more familiar with open source platforms and said they provided better guidance. On the support front, 25% opined that these platforms offer superior round-the-clock assistance.

Exploring the future of API gateway technologies:

The landscape of API gateway technologies is evolving too, with open source solutions gaining prominence. In this year's adoption forecast, Google Apigee emerges as the leading choice

for nearly half of the companies surveyed, with 47% stating it as their preference. Mulesoft is the choice of 16% of the companies surveyed while 12% are in favour of Kong. Seven per cent are in favour of Axway, another key player. The remaining 18% said they will choose between AWS API Gateway, NGINX Plus, and Gravitee, reflecting a varied and dynamic market. **END** 🐧
