

Creating a Dockerfile

Let's check Docker status:

```
test@ubuntu:~/Desktop$ sudo service docker status
```

Now verify the existing Docker images:

Figure 5: *Post Build* actions

```
test@ubuntu:~/Desktop$ sudo docker images
REPOSITORY    TAG       IMAGE ID   CREATED   SIZE
```

Next, verify existing Docker containers:

```
test@ubuntu:~/Desktop$ sudo docker ps -a
CONTAINER ID   IMAGE     COMMAND   CREATED   STATUS    PORTS
NAMES
```

No images or containers are available as it is a fresh installation of Docker.

Let's run an nginx container to verify Docker:

```
test@ubuntu:~/Desktop$ sudo docker run -d -p 9999:80 nginx
Unable to find image 'nginx:latest' locally
latest: Pulling from library/nginx
