Huawei E355

Huawei E355 is the world's first data card with Wi-Fi for five users. It is a multi-mode wireless terminal for SOHOs (Small Office Home Office) and business professionals. It is a HSPA+ device with a 21 MBps DL and 5.76 MBps UL speed. Huawei E355 can connect with PCs and laptops or any USB adaptor and activate the Wi-Fi. It also comes with Type3i technology that provides up to 20 per cent higher upload and download speeds compared to non-Type3i devices, so that your browsing experience is good.

D-Link DWR-730

D-Link DWR-730 is a business card-sized, portable HSPA+ 21.6 MBps router that allows users to connect notebooks, tablets and smartphones to the Internet any time via a 3G connection. This connection can also be shared with up to eight users wirelessly. D-Link DWR-730 is an unlocked router and is compatible with a wide range of mobile service networks, making it ideal for people who are constantly on the go. D-Link DWR-730 also supports microSD cards up to 32 GB. Shares Anoop Jarial, "It is a mobile router with six hours of battery support. The 3G speed of the device is 21.6 MBps and the wireless speed is 150 MBps."

MTS M Blaze Ultra

MTS powers a superlative Internet experience with 9.8 MBps downloads and 3.6 MBps uploads. Powered by the EVDO Rev.B Phase 2 network, the MTS is one of the very few operators globally to have deployed this platform. Similar devices from other operators only provide a speed of 6.2 MBps. It connects up to five devices. MTS provides coverage in more than 500 cities in nine circles across India (Delhi, Rajasthan, Gujarat, Kerala, Karnataka, Tamil Nadu, UP West, Kolkata and West Bengal).

Sandeep Yadav, head, Voice and Data Business Lines, MTS India, shares, "M Blaze Ultra Wi-Fi provides greater value for money, both in terms of the device price as well as monthly charges compared to other similar products available in the market. Customers can take home an MBlaze Ultra Wi-Fi dongle by paying just Rs 1499. There is a wide range of monthly plans available for customers to choose from."

Edimax BR-6478AC

The Edimax BR-6478AC router supports the next generation IEEE 802.11ac wireless standard, which means higher data rates in the 5 GHz band. With a 300 MBps speed in the 2.4 GHz band and 867 MBps in the 5 GHz band, the BR-6478AC is ideal for HD video streaming and large file transfers. The router is also backward compatible with 802.11a/b/g/n to ensure seamless integration with legacy Wi-Fi devices. The BR-6478AC router features four Gigabit LAN ports and one Gigabit WAN port, offering data rates of up to a staggering 1000 MBps for users with the need for maximum network performance. With Gigabit Ethernet connectivity, the BR-6478AC can provide users a fast and smooth media streaming or network gaming experience.

Sanjay Joshi, head, Technical and Projects (India) at Edimax Technology Co Ltd, opines, "Reliability of the device and the network are the most important criteria. Different users have different hotspot requirements that cannot be fulfilled with similar devices, so when it comes to coverage and capacity, different types of hotspot devices such as routers/APs or range extenders are recommended."

Price: ₹ 13,000

(The router comes bundled with another router EW-7428HCn and in totality, the price is ₹ 13,000)
