Lava W520

The device comes with wireless cloud storage, a USB flash disk, mobile HDD and USB card reader. It creates a Wi-Fi hotspot from the 3G dongles or Ethernet connection and provides support for up to 32 users to access the Internet at the same time. It also supplies power to electronic products via USB as a power bank. The device automatically recognises ADSL/DHCO and WAN/LAN without any preset profile. Shares S N Rai, co-founder and director, Lava International Limited, "A good hotspot device should have a high bandwidth. A good portable Wi-Fi hotspot device should support speed up to 150 MBps. The USPs of Lava W520 are its sleek and slim design, the fact that it is highly pocket friendly and supports up to 32 users, and its massive 5200 mAh battery that can be used as a power bank. Apart from this, it supports cloud sharing of content stored on a Flash USB drive, mobile HDD or USB card reader."

Make your choice

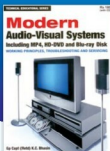

There are a plethora of hotspot devices available in the market for you to choose from. Buying a good one requires some thought. You need to look for a device that caters to your requirements. So, it is important to ask yourself some basic questions before you go looking for that perfect hotspot device.
