A wireless media streaming device from D-Link

If you are always on the move and wish to listen to your favourite numbers or watch movies,

D-Link, a leading player in consumer networking products, has a solution for you. The company has launched the DSM-260, a wireless media streaming device that

lets you play movies, music, games, etc, from your smartphone, tablet or laptop on to a big screen like the TV, projector or even home theatres. Tushar Sighat, CEO, D-Link (India) Limited, said, "D-Link DSM-260 is a device that allows you to get more out of your gadgets, as it perfectly complements a lot of your existing devices. Also, with its easy set-up and compact size, the DSM-260 is perfect for making presentations at work or while on the road." One has to just follow three simple steps to enjoy media streaming from the comfort of a couch.

Step 1: Plug the D-Link DSM-260 to your TV, home theatre or projector.

Step 2: Download the D-Link media app on your handheld gadget.

Step 3: Now connect your handheld device wirelessly to the DSM-260 and stream the media content available on your phone, tablet or laptop to the desired device like a TV, home theatre or projector.

Price: ₹ 3,990

Stop intruders with Cyberoam's next-gen firewall

Cyberoam, a leading global provider of network security appliances, has launched what it calls a next generation firewall

(NGFW)—the CR2500iNG. The firewall has Layer 8 identity-based technology that offers enterprises actionable intelligence and controls. Cyberoam NGFW appliances offer application inspection and control, website filtering, HTTPS inspection, an intrusion prevention system, VPN (IPSec and SSL) and granular bandwidth controls. Additional security features like WAF (Web Application Firewall), a gateway anti-virus and anti-spam are also available.

Talking about the new launch, Abhilash Sonwane, SVP, product development, Cyberoam (a Sophos company), shared, "The product offers the best mix of performance, security, flexibility and price to the medium-large enterprise segment. Cyberoam plans to stay ahead in the NGFW market by offering the right features that meet the needs of organisations, quickly, at the right price, along with the flexibility (Cyberoam Flexi Ports) and scalability (Cyberoam's Extensible Security Architecture) options that enterprises need to keep their security up to date and to ensure their current investments in security remain viable in the future too."

Price: ₹ 3.5 to ₹ 5 million

Address: Cyberoam (A Sophos company), Cyberoam House, Saigulshan Complex, Opposite Sanskruti, Beside White House, Panchwati Cross Road, Ahmedabad 380006; **Ph:** 079-66216666; **Email:** sales@cyberoam.com;

Check out SanDisk's Ultra Dual USB drive

Do you often wish to transfer files between your Android device and your computer?

SanDisk's recently launched Ultra Dual USB drive may be the perfect option for you. The device is a USB flash drive

that sports both a micro-USB and a USB 2.0 connector in a compact form. The flash drive is

meant for Android smartphone and tablet users to store files such as images and videos directly from their devices

to the storage available on SanDisk's Ultra Dual USB drive. The device is available in capacities ranging from 16 GB to 64 GB. When we caught up with Rajesh Gupta, country manager, India, SanDisk Corporation, he said, "Android users can leverage the benefits of this flash drive as it is a nice choice for everyday use. Moreover, if you have a penchant for stylish devices, this is just the one for you."
