

A List Of Antivirus Solutions Providers

AVG India | Mumbai

AVG AntiVirus PRO for Android not only keeps your phone and private data safe from viruses and malware, but also assists in recovering a lost or stolen mobile device, and even ensures optimal performance. It is easy to use and works on all versions of Android, v1.6 onwards. AVG Linux Server Edition helps protect the critical emails and invaluable data that enable your business to grow. It helps ensure virus-free inboxes and Linux servers, as well as helps secure communications with AVG Anti-Virus and Anti-Spyware, AVG File Server Protection and AVG Anti-Spam.

Avast India | Pune

avast! is an antivirus suite, which integrates the avast! antivirus kernel, and is designed to be used on UNIX-like operating systems. The suite consists of a command-line scanner, a resident scanner running as a daemon, and a client for accessing the resident scanner. The avast! engine for Linux features outstanding unpacking support too. It can scan inside almost the same number of archives as under Windows, with the exception of MAPI, CAB, ACE, CHM, ZIP and NTFS streams. The latest version of the avast! antivirus kernel features outstanding detection abilities, together with high performance. You can expect 100 per cent detection of in-the-wild viruses (viruses already spreading between users) and excellent detection of Trojans with minimum false positives.

Bitdefender

Bitdefender Antivirus Scanner for Linux and FreeBSD systems is in great demand in the market, thanks to the rising popularity of the Linux platform. It safeguards both UNIX-based and Windows-based disk partitions by scanning for viruses and spyware. Its easy-to-use graphical user interface complements a powerful command line interface that fully supports OS scripting tools. Bitdefender Antivirus Free ensures Android devices stay clean by automatically scanning any application immediately after its installation. This also helps users stay informed and protected whenever they try a new application.

Comodo Security Solutions Pvt Ltd | Chennai

Comodo Antivirus for Linux (CAVL) offers the same great virus protection as it offers for Windows software with the added bonus of a fully configurable anti-spam system. Featuring on-access and on-demand virus scanners, CAVL also uses cloud-based behaviour analysis of unknown files to provide unrivalled protection against zero-day malware. The powerful AV engine is complemented by a highly configurable mail gateway to filter spam and block email-borne threats. Its mail filter is compatible with Postfix, gmail, Sendmail and Exim MTAs.

Doctor Web | Moscow, Russia

Doctor Web is one of the few anti-virus vendors in the world to have its own technologies to detect and cure malware. Its anti-virus protection system allows the information systems of its customers to be protected
