Arise launches Android-powered LED TVs

Arise India has launched its new range of LED TVs, that are powered by the Android 4.2 (Jelly Bean) operating system. With this launch, the company is eyeing a 24 per cent growth in turnover, amounting to Rs 15,500 million, in this fiscal year. The new range of LED TVs from Arise allows consumers to surf the Internet and enjoy Android applications on their TV sets.

The TVs offer synchronising options—users can view TV programmes or channels on their smartphones or tablets by installing a specific app that synchronises TV programmes running on cable connectivity. This makes it easier to watch one's favourite shows from anywhere. Additionally, the range comes with a QWERTY keyboard and a 15.24 cm joy stick to play games on the TV. Users can surf the Internet, browse the Web, enjoy Wi-Fi, as well as features like home share, component video input, MHL link, and be paired with an Android phone directly through an HDMI port. The TV sets support image formats such as MPEG4, MP3 and JPEG, have USB connectivity, and memory that can be expanded via the microSD card.

Price: ₹ 35,000 onwards

The new Spice Stellar 600 has free storage on Spice Cloud

In order to bring out devices that are both flamboyant and productive, Spice Retail Limited has unveiled its first Android KitKat-based smartphone, the Spice Stellar 600. The handset has a classy look and 15.24 cm edge-to-edge QHD IPS display. It features the free utility dock, which has a four-in-one stylus, 3G video calling, G Sensor, dual SIM, and a 1.3 GHz Quad Core processor. It has an 8 megapixel rear camera and a 3.2 MP front-facing camera with an LED flash. It also has 1 GB RAM and 4 GB ROM. The 2500 mAh battery has a talktime of over 5 hours and up to 170 hours in standby mode. The Spice Stellar 600 comes with 2 GB of free storage on Spice Cloud that enables users to seamlessly access photos, documents, music, videos and contacts from multiple devices, along with advanced security and anti-theft features.

Applications like Spice Cloud, WhatsApp, Opera, OLX, etc, come pre-embedded with it.

Anker's Smart Port is a 5-port wall charger

Anker has introduced a universal charger called the Smart Port with quick-charge 5-port technology. Dynamically adjusting to any device's unique maximum charging speed, the Smart Port takes the brainwork out of compatibility. Just plug it in and it'll do the rest. It offers all-in-one charging convenience with an industry-high 40W power output between five ports; and it charges any combination of phones, tablets or other USB-charged devices at full speed (up to 8 A). It even charges five power-hungry tablets all at once. It is compact and frees users from 'cable-chaos'. It is about the size of a deck of playing cards (91 x 58 x 26 mm) and weighs 130 grams so that it can be placed on workstations, night stands, or entryway desks—creating the perfect charging hub. It can also be carried around easily while travelling.

With the use of top-grade microchips and built-in fail-safes, users are assured of receiving full power and complete safety. A unique port-level circuit protection system shuts down the charger in the event of over voltage, over current, overheating or short circuits. It is compatible with all the phones, tablets and other USB-charged devices. It is also available in white.
