

iBall's Rust-BTH—a Bluetooth headset that combines sound and style

iBall has launched another innovative product with the latest technology, a Bluetooth headset named Rust-BTH. It is a combination of sound and style, and promises a good listening experience for those who refuse to compromise on sound and design. Rust is equipped with an inbuilt microphone, which allows one to make voice calls effortlessly. It is packaged along with an extra input to make it compatible with every device, via a 3.5 mm line-in jack.

The easy-to-use portable headset has a powerful in-built battery that enables users to enjoy uninterrupted music of 10 hours and talk time of up to 12 hours at a stretch. What makes Rust more advanced is its voice prompt alert for pairing with Bluetooth devices and for powering on/off. The Bluetooth headset offers good bass and sound reproduction with a powerful 40mm driver system. It has an attractive leather body, is very light, and comes with soft cushioned ear-cups that enhance the comfort for users. It can also be folded, and can smartly manage calls even while connected to tablets, laptops or phones. It promises a power-packed experience for music enthusiasts, besides being quite affordable.

Kingston's latest micro card allows continuous video capture

Kingston has launched its Class 10 UHS-I 90R/45W microSDHC/SDXC card, which offers 90R/45W performance to allow continuous video and image capture. This allows consumers to expand the storage of their Android tablets and smartphones by transferring files to or from their desktops.

The card is available in 16 GB, 32 GB and 64 GB capacities. A 90 MB/s read and 45 MB/s write speed allows users to shoot full HD or 3D videos, makes real-time broadcasts faster and interruption-free, and helps to capture images continuously. It is flexible as it can be combined with the SD adapter, and can also be used as a full-size SDHC/SDXC card. The dimensions of this card are 11×15×1 mm. It comes with a lifetime warranty.

Price: Starting from ₹ 1,100

LG's new G Pad tablet provides seamless convergence

LG has launched the 25.64 cm G Pad tablet that is likely to give tough competition to others in the market.

The G Pad 10.1 is also called a "perfect for on-the-go media consumption" tablet featuring a 1.2 GHz quad-core Qualcomm Snapdragon processor under its hood and has 1 GB RAM with 16 GB internal memory, a microSD card to expand its memory, and an 8,000 mAh battery. The tablet has an HD display with a resolution of 1280×800 pixels.

There is a 5 MP primary camera and a 1.3 MP secondary camera. The tablet is 8.9 mm thick and runs the Android 4.4.2 KitKat OS. The G Pad comes preloaded with the G series' premium user interface, including a host of features carried over from the LG G3, such as 'touch & shoot', 'gesture shot for selfies', a smart intuitive keyboard and dual window or split windows to display content from two apps. The interesting features added in the tablet are the QPair, providing seamless convergence between Android-powered tablets and smartphones and Knock Code, which combines powering on and unlocking into one quick step.
