

```

<html>
<head>
<script>
function alert_click()
{
    alert("you clicked");
}
function JavaScript_function()
{
    alert("Hello");
}
myoperations.alert_script_signal.connect(JavaScript_
function);
</script>
</head>
<body>
<form name="myform">
<input type="button" value="Hit me" onclick="alert_click()">
</form>
</body>
</html>

```

Here is the main file:

```

#include <QtGui/QApplication>
#include <QApplication>
#include <QDebug>
#include <QWebFrame>
#include <QWebPage>
#include <QWebView>
class MyJavaScriptOperations : public QObject {
    Q_OBJECT
public:
    QWebView *view;
    MyJavaScriptOperations();
signals:
    void alert_script_signal();
public slots:
    void JS_ADDED();
    void loadFinished(bool);
};

void MyJavaScriptOperations::JS_ADDED()
{
    qDebug()<<__PRETTY_FUNCTION__;
    view->page()->mainFrame()->addToJavaScriptWindowObject("myope
rations", this);
}

void MyJavaScriptOperations::loadFinished(bool oper)
{
    qDebug()<<__PRETTY_FUNCTION__<< oper;
    emit alert_script_signal();
}

```

Figure 2: QT DEMO callback output

```

}

MyJavaScriptOperations::MyJavaScriptOperations()
{
    qDebug()<<__PRETTY_FUNCTION__;
    view = new QWebView();
    view->resize(400, 500);
    connect(view->page()->mainFrame(), SIGNAL(javascriptWindowObj
ectCleared()), this, SLOT(JS_ADDED()));
    connect(view, SIGNAL(loadFinished(bool)), this,
    SLOT(loadFinished(bool)));
    view->load(QUrl("./index.html"));
    view->show();
}

int main(int argc, char *argv[])
{
    QApplication a(argc, argv);
    MyJavaScriptOperations *jvs = new MyJavaScriptOperations;
    return a.exec();
}

#include "main.moc"

```

The output is shown in Figure 2.

Qt is a rich framework for C++ developers. It not only provides these amazing features, but also has some interesting attributes like in-built SQLite, D-Bus and various containers. It's easy to develop an entire GUI application with it. You can even port an existing HTML page to Qt. This makes Qt a wonderful choice to develop a cross-platform application quickly. It is now getting popular in the mobile world too.
